

PRIORITY LANE

Genève Aéroport is equipped with a Centralised Security Control (CSC), which consists of 16 screening points.

Airlines have the option to grant their premium passengers with the Priority Lane product. It gives the possibility to **use the distinct queuing lane and access quicker to the X-ray machines**. To enter this fast lane, a 2D bar code is required and only **passengers specifically authorized** by their airline or those who **bought a Priority Lane on-line** (www.gva.ch/eservices) can benefit from this service.

The priority lane is only accessible to boarding pass holders.
