Multinational Corporations

- There are 1'651 multinational companies in the GVA catchment area.
- Multinationals account for 90'688 jobs in Geneva (i.e.: 29% of total employment in the city) and 88'000 in the canton Vaud.
- 190 different nationalities are represented among the population (41% of Geneva's residents are foreign nationals).
- The city counts 130 EMEA headquarters due to its central location in Europe and proximity to Africa and the Middle East.

Financial Center

- Geneva is the birthplace and capital of international asset management with 120 banking firms, 3'200 financial intermediaries and 870 independent asset managers counting more than 35'000 employees (including insurance and law firms).

Trading & Shipping

- Thanks to its advantageous geographical position at the crossroads of European commercial routes, Geneva offers a unique and multilateral platform for the negotiation and improvement of the international management of commodities.
- The commodity trading sector in Geneva consists of 311 international trading, certification and shipping companies, and approx. 4'300 persons employed in the sector.
- Geneva hosts approx. 40% of global transactions and 50% of world traded coffee and sugar.

Pharmaceutical & Biotech/Medtech

- Geneva is part of BioAlps, the life science cluster in Western Switzerland:
 - 750 biotechnology, pharma and medtech companies
 - 500 research laboratories
 - 20 research institutions, universities and university hospitals with relevant capabilities and expertise
 - Numerous organizations supporting innovation (start-up incubators, science parks, venture capital funds, contract service organizations)
 - 20'000 people employed in companies and 5'000 researchers
- With the lengthening life expectancy and intensification of chronic diseases, global health care spend is expected to grow at 5% annually in the long-term.

Education & Research

- Switzerland is one of the best countries for the quality of its education, research and technologies. Université de Genève, Université de Lausanne (UNIL) and the Ecole Polytechnique Fédérale de Lausanne (EPFL) gather more than 27% (35'700) of total Swiss students.

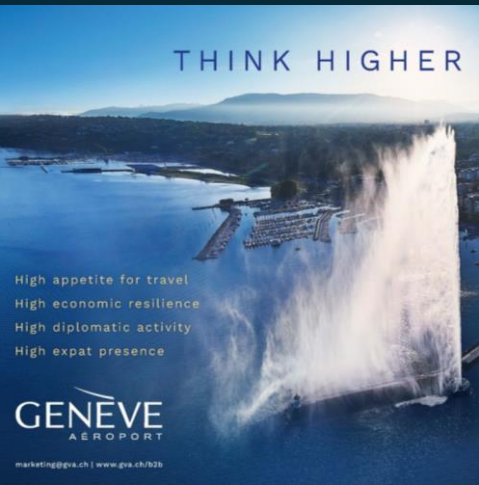

The map shows the locations of several key Swiss institutions:

- UNIVERSITÉ DE GENÈVE** (University of Geneva)
- HUG** (Hôpitaux Universitaires Genève)
- Hes·SO** (Haute Ecole Spécialisée de Suisse occidentale / Fachhochschule Westschweiz / University of Applied Sciences Western Switzerland)
- CERN** (World largest research centre in particle physics. Birthplace of the World Wide Web (www))
- EPFL** (Ecole Polytechnique Fédérale de Lausanne)
- IMD** (Real World. Real Learning. 1st in Executive Education outside the US and 2nd worldwide (Financial Times))
- ECOLE HOTELIERE LAUSANNE** (Since 1897)
- CHUV** (Centre Hospitalier Universitaire de Lausanne)
- Unil** (UNIL | Université de Lausanne)

3

- Freight
- East Wing
- Sustainability
- NewGen support
- Airport charges

Freight Activity

- Genève Aéroport offers a modern cargo terminal :
 - Warehouse: 24'000 m2 - Capacity: 100'000t/year
 - Refrigerated storage (Pharma & Perishables)
 - Safes for valuables
 - Handling room for radioactive goods
 - Loading platform adjustable for any type of lorry
 - Free ports (10'000m2) inside the freight terminal
 - French customs with possibility of direct customs clearance from the cargo building to all countries of the European Union
 - Very short consignment time: 70-90 min. on average
 - Reliability of services (punctual dispatch, no strikes, security for goods)

Main imported goods

Main exported goods

Spare parts for machinery

Chemical and pharma products

Perishables

Watches, jewelry

Electronic components

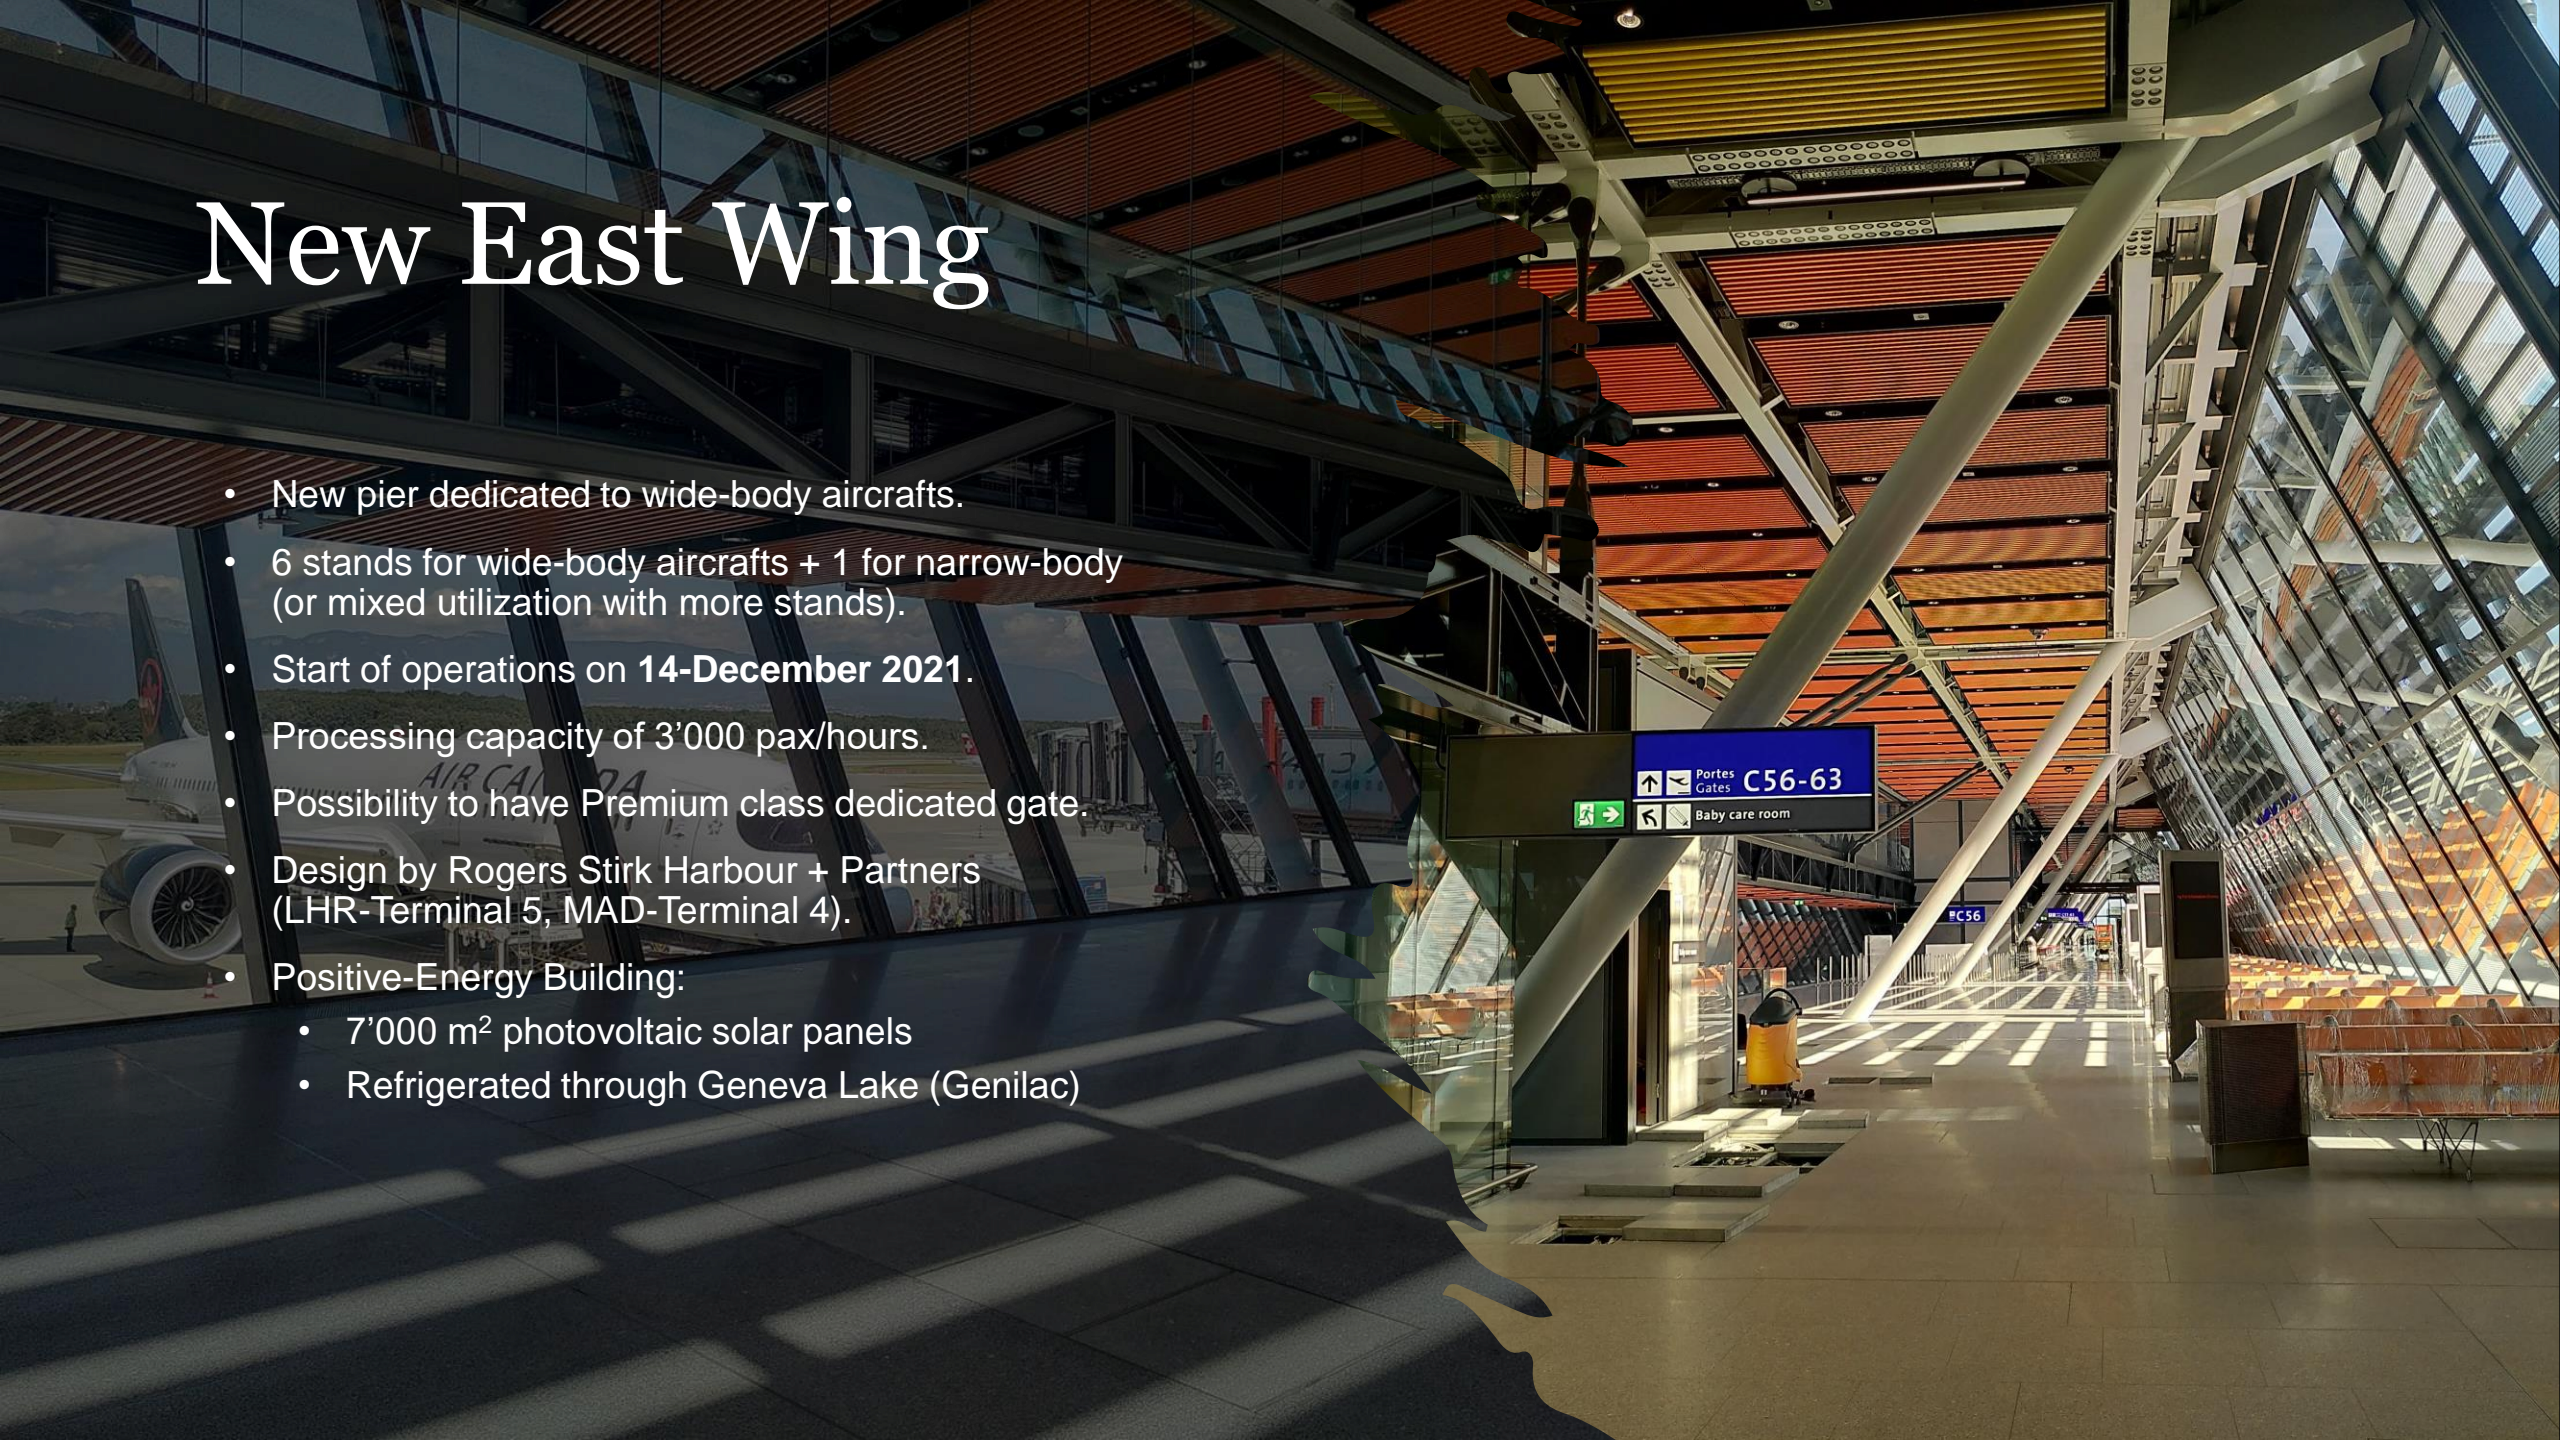

Machinery

Computer equipment

Electronic components

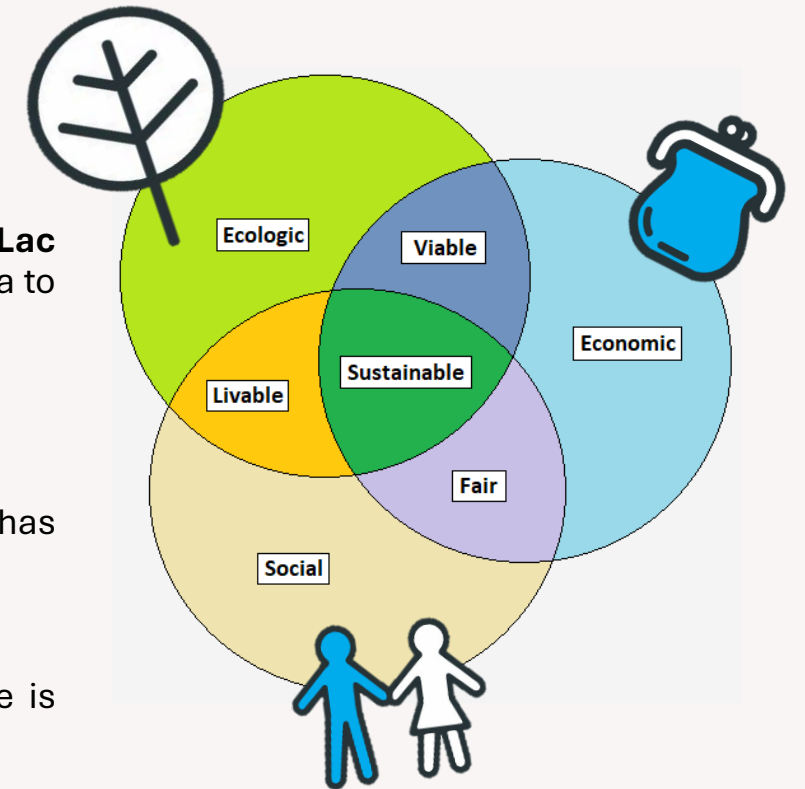

New East Wing

- New pier dedicated to wide-body aircrafts.
- 6 stands for wide-body aircrafts + 1 for narrow-body (or mixed utilization with more stands).
- Start of operations on **14-December 2021**.
- Processing capacity of 3'000 pax/hours.
- Possibility to have Premium class dedicated gate.
- Design by Rogers Stirk Harbour + Partners (LHR-Terminal 5, MAD-Terminal 4).
- Positive-Energy Building:
 - 7'000 m² photovoltaic solar panels
 - Refrigerated through Geneva Lake (Genilac)

Summary of Geneva Airport plans for the environment

- **2026: 60% reduction in CO2 emissions** from the airport platform through the new **GeniLac** network: an innovative, **100% renewable thermal solution** that uses water from Lake Geneva to cool and heat buildings.
 - **2028:** improvement of the **multimodal** platform.
 - **2030 latest:** reduction of waste, improvement of sorting, and minimizing incinerable waste.
 - **2030:** expansion of **photovoltaic panel** surface to reach **55,000 m²**. Geneva Airport currently has a surface area of 23,500 m².
 - **2030: 90% of vehicles** and equipment on the tarmac to be **electric**.
 - **2030:** increase the share of **sustainable passenger mobility to 58%**. Currently, this share is increasing and represented 48% in 2022.
 - **2032:** Stage 1 of the redesign of Terminal 1: optimization of buildings.
 - **2037:** achieve **net-zero CO2** for the **Geneva Airport platform**.
 - **2050:** Active contribution to achieving the goal of net-zero carbon emissions for the entire industry.
- Geneva was awarded the **EcoVadis Silver** label in September 2023 and was recertified **ACA3+** in November 2022. The airport is in the process of obtaining ACA 4+ (Airport Carbon Accredited Neutrality).

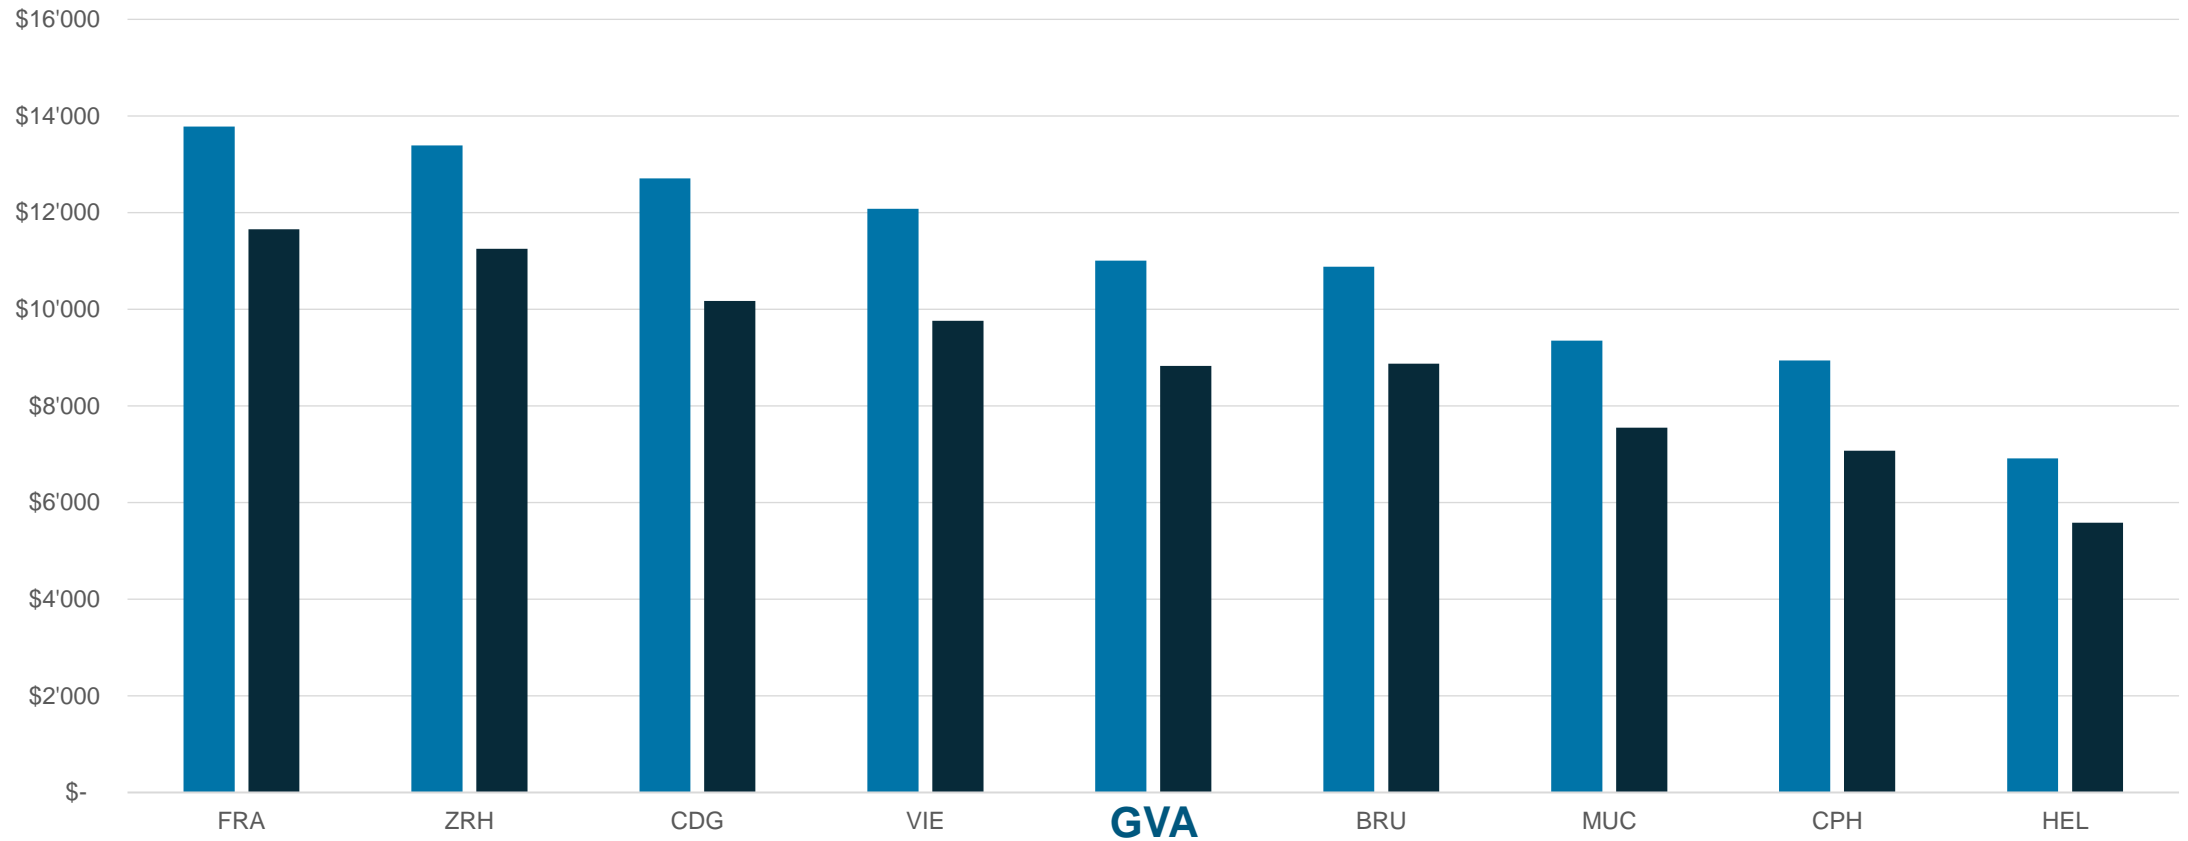

New Generation Aircraft Support

- Genève Aéroport adopted a scheme that recognizes the operation of new generation aircraft on the “best-in-class” principle.
- Narrow body aircraft categorized in **noise class 5** as well as wide-body aircraft categorized in **noise class 4** according to the Swiss AIP shall be entitled to the following rebates :
 - discount of **20%** on the **landing charge**
 - reduction of **CHF 0.40** on the **PSC** per departing passenger
 - bonus on landing charges for incremented movements of NewGen aircrafts
 - credit on the PSC if the load factor for a given year is greater than or equal 80%
- As an example, the benefit of an aircraft change from an A330-300 to a B787-8 can reach **CHF ~500'000** per year for a daily operation.

Airport Charges Comparison

Average charges for a long-haul operation

■ A350 ■ B787
