

12. Appendix A

12.1 Noise classification for jet aircraft

Noise class	Classification rule
I	Mean peak noise value aircraft type > mean peak noise value all aircraft types + 4.5 dB(A)
II	Mean peak noise value aircraft type ≤ mean peak noise value all aircraft types + 4.5 dB(A) and > mean peak noise value all aircraft types + 1.5 dB(A)
III	Mean peak noise value aircraft type ≤ mean peak noise value all aircraft types + 1.5 dB(A) and > mean peak noise value all aircraft types -1.5 dB(A)
IV	Mean peak noise value aircraft type ≤ mean peak noise value all aircraft types -1.5 dB(A) and > mean peak noise value all aircraft types - 4.5 dB(A)
V	Mean peak noise value aircraft type < mean peak noise value all aircraft types - 4.5 dB(A)
