

Environmental Policy

Genève Aéroport, in collaboration with its partners on the Airport platform, is committed to offering its customers a safe and efficient service that fully meets their expectations whilst respecting the principles of sustainable development.

In this perspective, Genève Aéroport is working to continuously improve its environmental performance and undertake to:

- comply with environmental regulations in force and anticipate new developments
- prevent and limit the environmental impact of air traffic and Airport activities by:
 - evaluating and monitoring noise levels, taking measures to reduce noise on the Airport platform and in surrounding built-up areas
 - minimising the emission of greenhouse gases as well as the discharge of pollutants into the air, water and soil
 - controlling the consumption of energy and natural resources
 - limiting the production of waste at source and encouraging their selective sorting
 - preserving airport natural habitats and their biodiversity
 - preventing environmental risks in coordination with the enterprise risk management system
- integrate environmental considerations at all levels by:
 - optimizing projects to mitigate their environmental impact
 - involving and motivating employees to ensure that they play an active role in controlling the environmental impact of the airport
 - encouraging partners on the site to curb the environmental impact of their activities
 - cooperating with suppliers and subcontractors who can provide services in line with this policy
- maintain the dialogue with the stakeholders by:
 - practising a policy of active consultation with its partners
 - communicating its commitment to the environment and local residents as well as its environmental performance
 - responding to request in a detailed manner

The general management assesses the relevance, appropriateness and effectiveness of the environmental management system. It ensures that the necessary resources are allocated and that all revenues from environmental surcharges are paid into an environment fund dedicated to the protection of environment and neighbouring communities.

Geneva, May 2018

André SCHNEIDER

CEO
